PROFESSIONAL SUMMARY

A Skilled Full Stack Developer with expertise in both frontend and backend technologies. Proficient in React.js, HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS for building responsive and dynamic UIs. Experienced in developing robust backend services using Node.js, Express.js, and working with databases like MongoDB and SQL (MySQL/PostgreSQL).

Hands-on experience in deploying full-stack web applications on platforms such as Netlify, Vercel, and Render. Strong knowledge of REST APIs, MVC architecture, and authentication using JWT. Proficient in Git and GitHub for version control, ensuring smooth collaboration and effective project management.

TECHNICAL SKILLS

Front-End Development

- HTML 5, CSS 3, Tailwind, Bootstrap,
- React-Bootstrap, JavaScript, React Js
- Responsive design

Version Control

- Git, Github

Others

- REST API, JWT Auth, Postman, MVC Architecture, EJS

Back-End Development

- Nodejs, Express Js, MongoDB, SQL
- API development and integration

Deployment

- Netlify, Vercel, Render

EDUCATION

- **B.E (I.T) | Monark University**
- **Diploma (I.T) | Gujarat Technological University**

React Js Developer (intern) | Softqube Technologies   June 2024 - Dec 2024

- Developed and implemented interactive drag-and-drop workflows using React Flow, including custom nodes and edge designs for enhanced UX.
- Contributed to a Prompt-to-Image Generation tool using React.js, integrating API calls and dynamic image rendering.
- Actively involved in multiple projects including BlogElevate (blog platform), DigitalDen (e-commerce store), and Mark Mentor (school CRM), focusing on UI development, API integration, and performance optimization.

Full Stack Developer | Sudarsana Entrepreneurs Units PVT LTD (Jan 2025 - May 2025)

- Worked on CircleMeet, a real-time chat application where I was responsible for handling backend API integration, user authentication using JWT, and managing real-time messaging functionalities.
- Developed and maintained Ten-X Studio, a professional company website, implementing features like contact forms with Nodemailer for automated email responses. Fixing UI issues and enhancing the user interface for a seamless experience.
- Built IdharUdhar, a cab booking application, focusing on frontend user flow, API consumption, and map integration.
- Contributed to SeuUnits, a company portfolio website, optimizing design responsiveness, and managing backend APIs for dynamic content delivery.

PROJECTS

Mark Mentor | School Management System

- Developed a comprehensive web-based CRM platform for schools using the MERN stack. The system included key modules such as student records management, attendance tracking, examination scheduling, billing, and detailed reporting. Focused on delivering a responsive and user-friendly interface using React.js and Tailwind CSS, ensuring accessibility across devices. On the backend, created secure and scalable REST APIs with Express and Node.js, and implemented JWT-based authentication for admin and staff roles. Prioritized clean UI/UX and robust data handling to streamline daily school operations effectively.

Tech Stack : HTML, CSS, JavaScript, Tailwind CSS, React Js, Node.js, Express.js, MongoDB

Blog Elevate | Blogging & News Platform

- Built a modern and fully functional blogging and news platform featuring secure JWT-based authentication and premium content access control. Designed and developed clean RESTful APIs using Express.js and Node.js to handle user management, post publishing, and content delivery. Implemented a responsive and visually appealing frontend with React.js and Tailwind CSS to ensure seamless user experience across all devices. Deployed the complete application with real-world configurations, demonstrating strong full-stack capabilities and hands-on deployment experience.

Tech Stack : HTML, CSS, JavaScript, Tailwind CSS, React Js, Node.js, Express.js, MongoDB

Digital Den | E-Commerce Store

- Developed a fully functional e-commerce web application with key features like product listing, add-to-cart functionality, checkout flow, and admin-side product management. Implemented secure and scalable RESTful APIs using Node.js and Express.js to manage products, users, and order data. Integrated MongoDB for efficient data handling, ensuring proper indexing and schema validation. The frontend was built with React.js and styled using Tailwind CSS to provide a responsive, fast, and engaging user experience. Focused on dynamic routing, real-time updates, and smooth UI/UX to deliver a seamless shopping experience.

  Tech Stack : HTML, CSS, JavaScript, Tailwind CSS, React Js,Node.js, Express.js, MongoDB

FickleFlight – Flight UI with JWT Login System

- FickleFlight is a visually appealing flight booking UI replica developed using React.js, enhanced with secure JWT-based authentication. The project features protected routes, login form validation, and session handling using localStorage. Tailwind CSS was used to recreate a premium flight booking interface, focusing on responsive design and smooth user interaction. This project showcases both frontend UI/UX skills and practical knowledge of authentication workflows in modern web apps.

  Tech Stack : HTML, CSS, JavaScript, Tailwind CSS, React Js   **Login Email :** eve.holt@reqres.in
